Tridek-One raises € 3 million from Advent France Biotechnology and Advent Life Sciences

Tridek One, Paris, June 4, 2019 - [Tridek One](#), a biotech company specialized in the development of products for the treatment of immune disorders, is pleased to announce a first round of funding of 3 million euros with leading investors Advent France Biotechnology and Advent Life Sciences.

"We are very pleased to see our work thus valued through the creation and funding of Tridek-One. This was made feasible with the support of Inserm Transfert, but also two European leading investment funds, Advent France Biotechnology and Advent Life Sciences," says Dr. Giuseppina Caligiuri, cardiologist and researcher in the INSERM Unit 1148 of the Bichat Hospital in Paris.

"Investing early in seed-type financing, in robust technology and science, is a prerequisite for Advent France Biotechnology team. This strategy is part of our DNA, because beyond the financial means, we are actively involved in the setting-up and structuring of the company alongside the founders," says Dr. Alain Huriez, Chairman and Managing Partner of Advent France Biotechnology.

"We believe this investment will accelerate the company's preparations for clinical trials of the first CD31 agonist, with the potential to provide safe and effective treatment for inflammatory vascular diseases," says Dr. Raj Parekh, General Partner of Advent Life Sciences.

About Tridek-One

Founded in 2018 by Dr. Giuseppina Caligiuri and Professor Antonino Nicoletti, researchers in INSERM Unit 1148, located at Bichat Hospital in Paris, together with Advent France Biotechnology, Tridek-One is developing a novel CD31 agonist approach to modulate immune activation and so provide a new way to manage inflammatory conditions.
